Global Capitalism: Selected Essays (RIPE Series in Global Political Economy) Hugo Radice

The essays in this volume were published across the 1984-2011 period, and range across a variety of topics and approaches to investigate the changing nature of global capitalism as a social order. As such, they are a valuable and instructive account of the evolution of global capitalism and of the debates which sought to make sense of this; moreover, they enable us to understand more clearly how capitalism may change and evolve in the coming years and decades.

The introduction provides a brief historical account of how global capitalism has changed since the 1960s, before summarising each of the essays, situating them more immediately in the context in which they were written. After sketching the evolution of his views over the period, the author concludes by discussing some important dimensions of global capitalism that need further study. The twelve essays are presented in four sections, dealing with the overarching theme of globalisation; the case of Britain; the developing regions of the global South and the former Soviet bloc; and the crisis that has gripped global capitalism since 2008.

Presenting an interdisciplinary approach that corresponds with the emergence of international political economy as a distinct field of scholarship, this book will prove to be an invaluable resource for students and scholars of international political economy, politics, economics, international relations, development studies, human geography, critical sociology and business studies.
