## Chapter 016, Rabbit Neoplasia (American College of Laboratory Animal Medicine) Mark Suckow

NOTE: This is a single chapter excerpted from the book *The Laboratory Rabbit, Guinea Pig, Hamster, and Other Rodents*, made available for individual purchase. Additional chapters, as well as the entire book, may be purchased separately.

This chapter presents new data that have been accumulated on rabbit neoplasia from case reports, descriptions of biological aspects of a variety of naturally occurring tumors, and reports of experimentally induced tumor models. Although much of the early data originated from rabbit colonies associated with major research institutions, the growing popularity of domestic rabbits as pets allows an increased ability to accumulate data on the spontaneous incidence of tumors in rabbits that are allowed to live a natural life span. Naturally occurring neoplasms in the rabbit were previously thought to be sporadic but there is evidence for a regular pattern in the incidence of the various tumor types known to be naturally associated with *Oryctolagus*. It is difficult to determine the actual incidence of spontaneous neoplasms in the domestic rabbit. The normal lifespan of the domestic rabbit *Oryctolagus* is 7–8 years, but they are used at younger ages in most research studies and breeding colonies, and are seldom maintained through their natural lifespan. Rabbits are similar to most species in that neoplasia is infrequent in juveniles and young adults.

### **From reader reviews:**

#### **Alan Williams:**

Have you spare time for a day? What do you do when you have much more or little spare time? Yep, you can choose the suitable activity to get spend your time. Any person spent their very own spare time to take a wander, shopping, or went to the Mall. How about open or perhaps read a book titled Chapter 016, Rabbit Neoplasia (American College of Laboratory Animal Medicine)? Maybe it is to be best activity for you. You know beside you can spend your time along with your favorite's book, you can more intelligent than before. Do you agree with the opinion or you have various other opinion?

#### **Margaret Holt:**

The actual book Chapter 016, Rabbit Neoplasia (American College of Laboratory Animal Medicine) will bring one to the new experience of reading a book. The author style to describe the idea is very unique. If you try to find new book you just read, this book very suited to you. The book Chapter 016, Rabbit Neoplasia (American College of Laboratory Animal Medicine) is much recommended to you to learn. You can also get the e-book in the official web site, so you can quicker to read the book.

#### **James Soltero:**

As we know that book is essential thing to add our information for everything. By a book we can know everything we want. A book is a group of written, printed, illustrated or perhaps blank sheet. Every year has been exactly added. This reserve Chapter 016, Rabbit Neoplasia (American College of Laboratory Animal Medicine) was filled concerning science. Spend your spare time to add your knowledge about your science competence. Some people has various feel when they reading a book. If you know how big selling point of a book, you can feel enjoy to read a guide. In the modern era like now, many ways to get book that you simply wanted.

#### **Anne Shibata:**

That reserve can make you to feel relax. That book Chapter 016, Rabbit Neoplasia (American College of Laboratory Animal Medicine) was multi-colored and of course has pictures around. As we know that book Chapter 016, Rabbit Neoplasia (American College of Laboratory Animal Medicine) has many kinds or category. Start from kids until adolescents. For example Naruto or Detective Conan you can read and feel that you are the character on there. Therefore , not at all of book are make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book for yourself and try to like reading this.
