Praise for the Our Future, Our Fault post-apocalyptic thriller series...

"The only thing I knew about this book was that it was going to have dinosaurs in it and it was going to be great! Ms. McCray did not disappoint! A book like no other it brings the past and future together and let's throw some humans together and you've got another great book to read! Dinosaur books are not exactly my favorite to read, but I found myself not wanting to put my kindle down until I found out what happened. Action through the whole book with a whopper of an ending! Never expected that! Can't wait to read the next book of this series."

Overview:

Five hundred years after we hit that not-so-mythical Tipping Point, the world plunged into a nuclear winter that counterbalanced global warming. A perfect climate for dinosaurs. However T. Rexs aren't the only threat. Syns (synthetic humans/robots) are still bent on destroying mankind and the occasional freak tornado are a constant threat for our heroes who are trying to find New Avalon.

More praise for McCray's thrillers...

"I have no idea what kind of whacked-out imagination it takes to come up with a story line like this, but I wish I had one! McCray does a fabulous job drawing you into the story, making you believe some pretty unbelievable stuff! And her research is impeccable. A must read. I can't wait for the sequel!"
