## **A Handbook on Using the Mixed Survey for Measuring Informal Employment and the Informal Sector (ESA STM)**

This handbook presents a cost-effective and reliable data collection strategy for measuring and analyzing informal employment and the informal sector. The cornerstone of this methodology is a version of the mixed survey that is anchored to the Labor Force Survey conducted regularly by developing countries. The Handbook draws from experience in the implementation of the mixed survey in Armenia, Bangladesh, and Indonesia under regional technical assistance 6430: Measuring the Informal Sector. It discusses viable methodologies and processes by which data collected from the mixed survey can be utilized to generate statistics on informal employment and the informal sector. The empirical evidence that will be produced can solidify the efforts on these topics, from research to policy making.
