# Mathematical Risk Analysis: Dependence, Risk Bounds, Optimal Allocations and Portfolios (Springer Series in Operations Research and Financial Engineering)

*Ludger Rüschendorf*

## **Mathematical Risk Analysis: Dependence, Risk Bounds, Optimal Allocations and Portfolios (Springer Series in Operations Research and Financial Engineering)** Ludger Rüschendorf

The author's particular interest in the area of risk measures is to combine this theory with the analysis of dependence properties. The present volume gives an introduction of basic concepts and methods in mathematical risk analysis, in particular of those parts of risk theory that are of special relevance to finance and insurance. Describing the influence of dependence in multivariate stochastic models on risk vectors is the main focus of the text that presents main ideas and methods as well as their relevance to practical applications. The first part introduces basic probabilistic tools and methods of distributional analysis, and describes their use to the modeling of dependence and to the derivation of risk bounds in these models. In the second, part risk measures with a particular focus on those in the financial and insurance context are presented. The final parts are then devoted to applications relevant to optimal risk allocation, optimal portfolio problems as well as to the optimization of insurance contracts. Good knowledge of basic probability and statistics as well as of basic general mathematics is a prerequisite for comfortably reading and working with the present volume, which is intended for graduate students, practitioners and researchers and can serve as a reference resource for the main concepts and techniques.

**From reader reviews:**

**Matthew Thompson:**

Hey guys, do you wish to find a new book to learn? Maybe the book with the name Mathematical Risk Analysis: Dependence, Risk Bounds, Optimal Allocations and Portfolios (Springer Series in Operations Research and Financial Engineering) suitable to you? Often the book was written by renowned writer in this era. Often the book entitled Mathematical Risk Analysis: Dependence, Risk Bounds, Optimal Allocations and Portfolios (Springer Series in Operations Research and Financial Engineering) is one of several books that everyone reads now. This book has inspired lots of people in the world. When you read this guide you will enter the new way of measuring that you never knew ahead of. The author explained their thoughts in the simple way, so all of people can easily understand the core of this subject. This book will give you a lot of information about this world now. So you can see the representation of the world in this particular book.

**Macie Tiffany:**

Playing with family in the park, coming to see the water world or hanging out with buddies is something that usually you will have done when you have spare time, then why don't you try something that is really opposite from that. I like an activity that makes you not feel tired but still relaxing, thrilling like on a roller coaster you are riding on and with additional info. Even you love Mathematical Risk Analysis: Dependence, Risk Bounds, Optimal Allocations and Portfolios (Springer Series in Operations Research and Financial Engineering), you may enjoy both. It is a very good combination, right, you still would like to miss it? What kind of hangout type is it? Oh seriously it's mind-blowing guys. What? Still don't buy it, oh come on it's identified as reading friends.

**Jennifer Witherspoon:**

You will get this Mathematical Risk Analysis: Dependence, Risk Bounds, Optimal Allocations and Portfolios (Springer Series in Operations Research and Financial Engineering) by browsing the bookstore or Mall. Just viewing or reviewing it can be your solve trouble if you get difficulties for your knowledge. Kinds of this publication are various. Not only simply by written or printed but in addition you can enjoy this book by e-book. In the modern era such as now, you just looking at your mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still updated. Let's try to choose correct ways for you.

**Pearlie Wong:**

That book can make you feel relaxed. This book Mathematical Risk Analysis: Dependence, Risk Bounds, Optimal Allocations and Portfolios (Springer Series in Operations Research and Financial Engineering) was vibrant and of course has pictures on the website. As we know that book Mathematical Risk Analysis: Dependence, Risk Bounds, Optimal Allocations and Portfolios (Springer Series in Operations Research and

Financial Engineering) has many kinds or type. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and think you are the character on there. So , not at all of book usually are make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading which.
