The National Children's Study (NCS) was authorized by the Children's Health Act of 2000 and is being implemented by a dedicated Program Office in the Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD). The NCS is planned to be a longitudinal observational birth cohort study to evaluate the effects of chronic and intermittent exposures on child health and development in the U.S.. The NCS would be the first study to collect a broad range of environmental exposure measures for a national probability sample of about 100,000 children, followed from birth or before birth to age 21.

Detailed plans for the NCS were developed by 2007 and reviewed by a National Research Council / Institute of Medicine panel. At that time, sample recruitment for the NCS Main Study was scheduled to begin in 2009 and to be completed within about 5 years. However, results from the initial seven pilot locations, which recruited sample cases in 2009-2010, indicated that the proposed household-based recruitment approach would be more costly and time consuming than planned. In response, the Program Office implemented a number of pilot tests in 2011 to evaluate alternative recruitment methods and pilot testing continues to date.

At the request of Congress, *The National Children's Study 2014* reviews the revised study design and proposed methodologies for the NCS Main Study. This report assesses the study's plan to determine whether it is likely to produce scientifically sound results that are generalizable to the United States population and appropriate subpopulations. The report makes recommendations about the overall study framework, sample design, timing, content and need for scientific expertise and oversight.

The National Children's Study has the potential to add immeasurably to scientific knowledge about the impact of environmental exposures, broadly defined, on children's health and development in the United States. The recommendations of this report will help the NCS will achieve its intended objective to examine the effects of environmental influences on the health and development of American children.

**From reader reviews:**

**Irene Holmes:**

What do you consider book? It is just for students as they are still students or this for all people in the world, what the best subject for that? Only you can be answered for that problem above. Every person has different personality and hobby for every other. Don't to be pressured someone or something that they don't need do that. You must know how great and important the book The National Children's Study 2014: An Assessment. All type of book would you see on many resources. You can look for the internet resources or other social media.

**Laquita Horton:**

This book untitled The National Children's Study 2014: An Assessment to be one of several books that best seller in this year, this is because when you read this book you can get a lot of benefit on it. You will easily to buy this kind of book in the book retail outlet or you can order it through online. The publisher on this book sells the e-book too. It makes you quickly to read this book, because you can read this book in your Smart phone. So there is no reason to you to past this publication from your list.

**Athena Thornton:**

Reading can called thoughts hangout, why? Because if you are reading a book specially book entitled The National Children's Study 2014: An Assessment your mind will drift away trough every dimension, wandering in every aspect that maybe not known for but surely will end up your mind friends. Imaging each and every word written in a book then become one application form conclusion and explanation in which maybe you never get before. The The National Children's Study 2014: An Assessment giving you an additional experience more than blown away your head but also giving you useful facts for your better life in this particular era. So now let us demonstrate the relaxing pattern here is your body and mind will probably be pleased when you are finished looking at it, like winning a casino game. Do you want to try this extraordinary paying spare time activity?

**Melissa Fanning:**

Do you like reading a e-book? Confuse to looking for your selected book? Or your book had been rare? Why so many question for the book? But any kind of people feel that they enjoy to get reading. Some people likes looking at, not only science book and also novel and The National Children's Study 2014: An Assessment or even others sources were given information for you. After you know how the fantastic a book, you feel desire to read more and more. Science reserve was created for teacher or perhaps students especially. Those ebooks are helping them to include their knowledge. In some other case, beside science publication, any

other book likes The National Children's Study 2014: An Assessment to make your spare time more colorful.
