## **Cliques and Capitalism** Deborah E. de Lange

De Lange suggests a new contextually linked building block model to develop theories of the firm in the field of strategy and organizations. Using this approach, she proposes two models: one that is a realistic American version and another that is a futuristic sustainable model. Both are new networked models that integrate current theories; a review of international corporate governance supports the sustainable firm that solves problems of the current one. Through a revised theoretical lens, the book answers a provocative question surrounding modern corporate America: Who wields the power? In this investigative look at the institutional mechanisms behind who is truly running the show, *Cliques and Capitalism* seeks to not only explain why the current corporate system fails to function well, but also offers solutions for improved corporate governance through a new sustainable model.
