Pioneers of Microbiology and the Nobel Prize Ulf Lagerkvist

We are swamped with information and each day seems to bring new discoveries that must be considered. Never before in the history of science have so many scientists been as active as today. It has become a major problem for the expert just to keep up with the literature in his or her own field of research. Why, then, should experts and their poor students worry about the pioneers of microbiology, those half-forgotten scientists who a century ago devoted their lives to a new science that was on its way to revolutionizing medicine?

With so many new facts and problems screaming for our attention, it is easy to lose sight of the long road that we have travelled in order to get to the point where we are now. Tracing the path of those who have gone before us will help us to see our own scientific goals and efforts in a more revealing perspective.

The great figures who are at the center of interest in this book — Robert Koch, Emil von Behring, Paul Ehrlich and Elie Metchnikoff — were far from uncontroversial during their lifetimes. It is interesting to see how they were judged by their peers at the Karolinska Institutet when they were considered for the Nobel Prize.

Pioneers of Microbiology and the Nobel Prize has been written in such a way that it can be enjoyed even without an extensive knowledge of microbiology and medicine. In fact, a considerable part of the book portrays the state of medicine during the middle of the 19th century, when bacteriology can be said to have made its debut on the medical scene.

Contents:

- The Sites of Diseases
- Cellular Pathology
- The New Physiology
- Bankruptcy and a Gleam of Hope
- Contagion Versus Miasma
- The Birth of Microbiology
- Bacteriology and the Nemesis of Surgery
- Robert Koch
- Emil von Behring
- Paul Ehrlich
- Elie Metchnikoff
- Nobel Prizes and Nobel Committees (1901, 1905 and 1908)
- In Defence of the Nobel Prize

Readership: Microbiologists; medical researchers, undergraduates and graduate students in microbiology and the life sciences; general readers.

From reader reviews:

Jacqueline Kang:

What do you with regards to book? It is not important to you? Or just adding material when you require something to explain what your own problem? How about your free time? Or are you busy individual? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have time? What did you do? Everybody has many questions above. They need to answer that question because just their can do which. It said that about guide. Book is familiar in each person. Yes, it is correct. Because start from on jardín de infancia until university need that Pioneers of Microbiology and the Nobel Prize to read.

Barbara Palmer:

Reading a guide tends to be new life style in this particular era globalization. With examining you can get a lot of information that could give you benefit in your life. Together with book everyone in this world may share their idea. Textbooks can also inspire a lot of people. A lot of author can inspire their very own reader with their story or even their experience. Not only the storyplot that share in the textbooks. But also they write about the knowledge about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors on earth always try to improve their skill in writing, they also doing some exploration before they write to their book. One of them is this Pioneers of Microbiology and the Nobel Prize.

Cindy Johnson:

Playing with family in the park, coming to see the water world or hanging out with good friends is thing that usually you could have done when you have spare time, after that why you don't try factor that really opposite from that. A single activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Pioneers of Microbiology and the Nobel Prize, you could enjoy both. It is very good combination right, you still need to miss it? What kind of hang type is it? Oh occur its mind hangout people. What? Still don't have it, oh come on its referred to as reading friends.

Alberto Kimble:

In this age globalization it is important to someone to receive information. The information will make someone to understand the condition of the world. The health of the world makes the information simpler to share. You can find a lot of references to get information example: internet, classifieds, book, and soon. You can observe that now, a lot of publisher which print many kinds of book. The actual book that recommended for you is Pioneers of Microbiology and the Nobel Prize this publication consist a lot of the information in the condition of this world now. This particular book was represented so why is the world has grown up. The language styles that writer require to explain it is easy to understand. The actual writer made some study when he makes this book. Honestly, that is why this book suitable all of you.
