**Statistical Techniques in Geographical Analysis, Third Edition** Dennis Wheeler, Gareth Shaw, Stewart Barr

Applying statistical techniques for geographical data collection and analysis can be a difficult and challenging process, especially for students who have not studied formal mathematics for many years.

Assuming no more knowledge than basic GCSE maths, this book provides a gentle introduction on how to confidently approach a wide range of methods and apply them in either one or both of the leading software statistical packages, SPSS and MINITAB.

Statistical Techniques in Geographic Analysis provides a significant number of practical examples that ensure understanding and promote further development. The book covers the four key areas of univariate, bivariate, multivariate and spatial techniques.

Statistical Techniques in Geographic Analysis also includes a CDROM that offers students the chance to practice their application of each method in either MINITAB or SPSS.
