Land Plants - Trees (Advances in Botanical Research)

Land Plants - Trees (Advances in Botanical Research)

Advances in Botanical Research publishes in-depth and up-to-date reviews on a wide range of topics in plant sciences. Currently in its 74th volume, the series features several reviews by recognized experts on all aspects of plant genetics, biochemistry, cell biology, molecular biology, physiology, and ecology. This volume features reviews on the advances in knowledge for the main traits important in fruit trees and forest trees, the advances in tools and resources for genetics and genomics in these species, and the knowledge developed in three rather separated communities of researchers: forest, fruit trees, and grapevines.

- Provides an update of the knowledge related to plant biology for the main traits for forest and fruit trees
- Provides an update about the tools available for the study of this category of plants
- Gives a general view of research results obtained in two separate research communities, fruit trees and forest trees
