Verification and Validation of Complex Systems: Human Factors Issues (Nato ASI Subseries F:) John

A. Wise, V.David Hopkin, Paul Stager

Despite its increasing importance, the verification and validation of the human-machine interface is perhaps the most overlooked aspect of system development. Although much has been written about the design and development process, very little organized information is available on how to verifyand validate highly complex and highly coupled dynamic systems. Inability toevaluate such systems adequately may become the limiting factor in our ability to employ systems that our technology and knowledge allow us to design.

This volume, based on a NATO Advanced Science Institute held in 1992, is designed to provide guidance for the verification and validation of all highly complex and coupled systems. Air traffic control is used an an example to ensure that the theory is described in terms that will allow its implementation, but the results can be applied to all complex and coupled systems.

The volume presents the knowledge and theory ina format that will allow readers from a wide variety of backgrounds to apply it to the systems for which they are responsible. The emphasis is on domains where significant advances have been made in the methods of identifying potential problems and in new testing methods and tools. Also emphasized are techniques to identify the assumptions on which a system is built and to spot their weaknesses.

From reader reviews:

Brandon Adams:

Reading a e-book can be one of a lot of action that everyone in the world likes. Do you like reading book and so. There are a lot of reasons why people like it. First reading a book will give you a lot of new data. When you read a book you will get new information due to the fact book is one of various ways to share the information as well as their idea. Second, examining a book will make an individual more imaginative. When you examining a book especially tale fantasy book the author will bring you to definitely imagine the story how the character types do it anything. Third, you are able to share your knowledge to other people. When you read this Verification and Validation of Complex Systems: Human Factors Issues (Nato ASI Subseries F:), you may tells your family, friends along with soon about yours book. Your knowledge can inspire the mediocre, make them reading a publication.

David Byrd:

Reading a publication tends to be new life style in this era globalization. With studying you can get a lot of information that could give you benefit in your life. Together with book everyone in this world may share their idea. Publications can also inspire a lot of people. Plenty of author can inspire their reader with their story or even their experience. Not only the storyline that share in the ebooks. But also they write about the information about something that you need instance. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors on earth always try to improve their proficiency in writing, they also doing some study before they write on their book. One of them is this Verification and Validation of Complex Systems: Human Factors Issues (Nato ASI Subseries F:).

Coleen Isabel:

Precisely why? Because this Verification and Validation of Complex Systems: Human Factors Issues (Nato ASI Subseries F:) is an unordinary book that the inside of the publication waiting for you to snap that but latter it will distress you with the secret this inside. Reading this book beside it was fantastic author who else write the book in such wonderful way makes the content interior easier to understand, entertaining approach but still convey the meaning fully. So, it is good for you because of not hesitating having this ever again or you going to regret it. This book will give you a lot of positive aspects than the other book have such as help improving your expertise and your critical thinking approach. So, still want to postpone having that book? If I had been you I will go to the e-book store hurriedly.

Verna Tubbs:

Verification and Validation of Complex Systems: Human Factors Issues (Nato ASI Subseries F:) can be one of your beginning books that are good idea. Many of us recommend that straight away because this book has good vocabulary that can increase your knowledge in vocab, easy to understand, bit entertaining but nevertheless delivering the information. The article writer giving his/her effort to place every word into

enjoyment arrangement in writing Verification and Validation of Complex Systems: Human Factors Issues (Nato ASI Subseries F:) yet doesn't forget the main stage, giving the reader the hottest and based confirm resource info that maybe you can be one of it. This great information can drawn you into brand-new stage of crucial thinking.
