**Dynamics of Fluids in Porous Media (Dover Civil and Mechanical Engineering)** Jacob Bear

This classic work by one of the world's foremost hydrologists presents a topic encountered in the many fields of science and engineering where flow through porous media plays a fundamental role. It is the standard work in the field, designed primarily for advanced undergraduate and graduate students of ground water hydrology, soil mechanics, soil physics, drainage and irrigation engineering, and petroleum and chemical engineering. It is highly recommended as well for scientists and engineers already working in these fields. Throughout this generously illustrated, richly detailed study, which includes a valuable section of exercises and answers, the emphasis is on understanding the phenomena occurring in porous media and on their macroscopic description. The book's chapter titles reveal its comprehensive coverage: Introduction, Fluids and Porous Matrix Properties, Pressures and Piezometric Head, The Fundamental Fluid Transport Equations in Porous Media, The Equation of Motion of a Homogeneous Fluid, Continuity and Conservation Equations for a Homogeneous Fluid, Solving Boundary and Initial Value Problems, Unconfined Flow and the Dupuit Approximation, Flow of Immiscible Fluids, Hydrodynamic Dispersion, and Models and Analogs. "Systematic and comprehensive . . . a book that satisfies the highest standards of excellence. . . . Will undoubtedly become the standard reference in this field." — R. Allen Freeze, IBM Thomas J. Watson Research Center, Water Resources Research.

### **From reader reviews:**

#### **Robin Boucher:**

This book entitled Dynamics of Fluids in Porous Media (Dover Civil and Mechanical Engineering) to be one of several books that will best seller in this year, honestly, that is because when you read this e-book you can get a lot of benefit into it. You will easily to buy this book in the book store or you can order it by means of online. The publisher of the book sells the e-book too. It makes you easier to read this book, since you can read this book in your Smartphone. So there is no reason for you to past this publication from your list.

#### **Sally Staten:**

Reading a publication can be one of a lot of activity that everyone in the world adores. Do you like reading book thus. There are a lot of reasons why people enjoyed. First reading a book will give you a lot of new details. When you read a e-book you will get new information simply because book is one of many ways to share the information or their idea. Second, looking at a book will make you actually more imaginative. When you studying a book especially fictional book the author will bring you to definitely imagine the story how the personas do it anything. Third, you can share your knowledge to some others. When you read this Dynamics of Fluids in Porous Media (Dover Civil and Mechanical Engineering), it is possible to tells your family, friends and also soon about yours e-book. Your knowledge can inspire others, make them reading a reserve.

#### **Donald Worsley:**

In this age globalization it is important to someone to find information. The information will make you to definitely understand the condition of the world. The health of the world makes the information quicker to share. You can find a lot of personal references to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher that print many kinds of book. The book that recommended for your requirements is Dynamics of Fluids in Porous Media (Dover Civil and Mechanical Engineering) this publication consist a lot of the information in the condition of this world now. This particular book was represented just how can the world has grown up. The words styles that writer value to explain it is easy to understand. The actual writer made some exploration when he makes this book. That's why this book suited all of you.

#### **Jose Williams:**

A lot of e-book has printed but it is different. You can get it by online on social media. You can choose the very best book for you, science, comedian, novel, or whatever by searching from it. It is named of book Dynamics of Fluids in Porous Media (Dover Civil and Mechanical Engineering). You can include your knowledge by it. Without making the printed book, it may add your knowledge and make you happier to read. It is most important that, you must aware about book. It can bring you from one spot to other place.
