Ship Resistance and Propulsion A. F. Molland

Ship Resistance and Propulsion is dedicated to providing a comprehensive and modern scientific approach to evaluating ship resistance and propulsion. The study of the propulsive power enables the size and mass of the propulsion engines to be established and estimates made of the fuel consumption and likely operating costs. This book, written by experts in the field, includes the latest developments from applied research, including those in experimental and CFD techniques, and provides guidance for the practical estimation of ship propulsive power for a range of ship types. This text includes sufficient published standard series data for hull resistance and propeller performance to enable practitioners to make ship power predictions based on material and data contained within the book. A large number of fully worked examples are included to illustrate applications of the data and powering methodologies; these include cargo and container ships, tankers and bulk carriers, ferries, warships, patrol craft, work boats, planing craft and yachts. The book is aimed at a broad readership including practising naval architects and marine engineers, sea-going officers, small craft designers, undergraduate and postgraduate degree students. It should also appeal to others involved in transportation, transport efficiency and eco-logistics who need to carry out reliable estimates of ship power requirements.

From reader reviews:

Eunice Bourque:

Reading a guide can be one of a lot of pastime that everyone in the world enjoys. Do you like reading book so. There are a lot of reasons why people enjoyed. First reading a guide will give you a lot of new facts. When you read a reserve you will get new information because book is one of many ways to share the information as well as their idea. Second, studying a book will make a person more imaginative. When you reading through a book especially fictional book the author will bring one to imagine the story how the figures do it anything. Third, you are able to share your knowledge to other individuals. When you read this Ship Resistance and Propulsion, you are able to tells your family, friends as well as soon about yours reserve. Your knowledge can inspire average, make them reading a publication.

Arthur West:

Is it you actually who having spare time in that case spend it whole day simply by watching television programs or just lying down on the bed? Do you need something totally new? This Ship Resistance and Propulsion can be the response, oh how comes? A fresh book you know. You are so out of date, spending your free time by reading in this brand new era is common not a geek activity. So what these publications have than the others?

Tasha Page:

You can find this Ship Resistance and Propulsion by visit the bookstore or Mall. Just viewing or reviewing it could to be your solve problem if you get difficulties to your knowledge. Kinds of this e-book are various. Not only by simply written or printed but can you enjoy this book through e-book. In the modern era like now, you just looking of your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose suitable ways for you.

Larry Hunter:

That e-book can make you to feel relax. This book Ship Resistance and Propulsion was multi-colored and of course has pictures around. As we know that book Ship Resistance and Propulsion has many kinds or category. Start from kids until youngsters. For example Naruto or Private investigator Conan you can read and believe you are the character on there. So , not at all of book are usually make you bored, any it offers up you feel happy, fun and loosen up. Try to choose the best book in your case and try to like reading which.
