It is imperative in social work practice that qualified practitioners fully understand how people develop and how the different stages in the average life course can alter and affect a person. Covering all stages of the life course, this book looks at the ways in which people develop before birth, as babies and children through adolescence and onto young, middle and older adulthood. With this knowledge, social workers are able to establish and maintain effective partnerships with both service-users and other professionals. The second edition of this popular social work text is packed with up-to-date case studies to support key ideas and help reinforce learning. New research findings have also been included and relevant government guidance and policy documents have been acknowledged to reflect current theory and practice. The book remains a key text for students on the social work degree requiring a thorough knowledge and understanding of human development and its impact on social work practice.
