Design and Analysis of Large Lithium-Ion Battery Systems (Power Engineering) Shriram Santhanagopalan, Kandler Smith, Jeremy Neubauer, Gi-Heon Kim, Ahmad Pesaran, Matthew Keyser
This new resource provides you with an introduction to battery design and test considerations for large-scale automotive, aerospace, and grid applications. It details the logistics of designing a professional, large, Lithium-ion battery pack, primarily for the automotive industry, but also for non-automotive applications. Topics such as thermal management for such high-energy and high-power units are covered extensively, including detailed design examples.

Every aspect of battery design and analysis is presented from a hands-on perspective. The authors work extensively with engineers in the field and this book is a direct response to frequently-received queries. With the authors' unique expertise in areas such as battery thermal evaluation and design, physics-based modeling, and life and reliability assessment and prediction, this book is sure to provide you with essential, practical information on understanding, designing, and building large format Lithium-ion battery management systems.

From reader reviews:

Mary Davis:

This Design and Analysis of Large Lithium-Ion Battery Systems (Power Engineering) tend to be reliable for you who want to certainly be a successful person, why. The reason why of this Design and Analysis of Large Lithium-Ion Battery Systems (Power Engineering) can be one of several great books you must have is actually giving you more than just simple studying food but feed an individual with information that perhaps will shock your prior knowledge. This book will be handy, you can bring it almost everywhere and whenever your conditions both in e-book and printed types. Beside that this Design and Analysis of Large Lithium-Ion Battery Systems (Power Engineering) giving you an enormous of experience for example rich vocabulary, giving you demo of critical thinking that we know it useful in your day pastime. So , let's have it appreciate reading.

Angel Sherrill:

In this time globalization it is important to someone to acquire information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information better to share. You can find a lot of references to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher that will print many kinds of book. The actual book that recommended for your requirements is Design and Analysis of Large Lithium-Ion Battery Systems (Power Engineering) this guide consist a lot of the information in the condition of this world now. This specific book was represented how can the world has grown up. The terminology styles that writer use to explain it is easy to understand. The actual writer made some analysis when he makes this book. Honestly, that is why this book appropriate all of you.

Cheree Rodriquez:

Do you like reading a guide? Confuse to looking for your favorite book? Or your book was rare? Why so many query for the book? But any kind of people feel that they enjoy with regard to reading. Some people likes reading through, not only science book but in addition novel and Design and Analysis of Large Lithium-Ion Battery Systems (Power Engineering) or others sources were given knowledge for you. After you know how the truly great a book, you feel want to read more and more. Science guide was created for teacher as well as students especially. Those publications are helping them to put their knowledge. In some other case, beside science guide, any other book likes Design and Analysis of Large Lithium-Ion Battery Systems (Power Engineering) to make your spare time a lot more colorful. Many types of book like here.

Michelle Jarvis:

A number of people said that they feel bored stiff when they reading a guide. They are directly felt that when they get a half regions of the book. You can choose often the book Design and Analysis of Large Lithium-

Ion Battery Systems (Power Engineering) to make your current reading is interesting. Your personal skill of reading ability is developing when you such as reading. Try to choose basic book to make you enjoy to learn it and mingle the idea about book and reading especially. It is to be very first opinion for you to like to open up a book and go through it. Beside that the guide Design and Analysis of Large Lithium-Ion Battery Systems (Power Engineering) can to be your friend when you're experience alone and confuse with the information must you're doing of these time.
