Systems Evaluation: Methods, Models, and Applications (Systems Evaluation, Prediction, and Decision-Making) Sifeng Liu, Naiming Xie, Chaoqing Yuan, Zhigeng Fang

A book in the *Systems Evaluation, Prediction, and Decision-Making Series*, **Systems Evaluation: Methods, Models, and Applications** covers the evolutionary course of systems evaluation methods, clearly and concisely. Outlining a wide range of methods and models, it begins by examining the method of qualitative assessment. Next, it describes the process and methods for building an index system of evaluation and considers the compared evaluation and the logical framework approach, analytic hierarchy process (AHP), and the data envelopment analysis (DEA) relative efficiency evaluation method.

Unique in its emphasis on the practical applications of systems evaluation methods and models, the book introduces several new evaluation models of grey system, including general grey incidence model, grey incidence models based on similarity and closeness, grey cluster evaluation based on triangular whitenization functions, and multi-attribute grey target decision model. Explaining intricate concepts in language that is easy to understand it provides step-by-step explanations of the various methods and models.

The text illustrates the practical application, analysis, and computation of systems evaluation methods and models with an abundance of practical examples and empirical studies. The case studies examine post evaluation of road-bridge construction projects, the efficiency evaluation of the science and technology activities, the evaluation of energy-saving projects in China, and the evaluation and selection of international cooperation projects.

From reader reviews:

Kathleen Land:

In this 21st one hundred year, people become competitive in each and every way. By being competitive at this point, people have do something to make these people survives, being in the middle of often the crowded place and notice by simply surrounding. One thing that often many people have underestimated that for a while is reading. Sure, by reading a publication your ability to survive increase then having chance to stand up than other is high. For you personally who want to start reading a new book, we give you this kind of Systems Evaluation: Methods, Models, and Applications (Systems Evaluation, Prediction, and Decision-Making) book as basic and daily reading reserve. Why, because this book is usually more than just a book.

Dave Thomas:

The e-book with title Systems Evaluation: Methods, Models, and Applications (Systems Evaluation, Prediction, and Decision-Making) includes a lot of information that you can study it. You can get a lot of profit after read this book. This book exist new understanding the information that exist in this publication represented the condition of the world at this point. That is important to yo7u to know how the improvement of the world. This particular book will bring you in new era of the globalization. You can read the e-book on the smart phone, so you can read the idea anywhere you want.

Jesse Kennedy:

A lot of people always spent their own free time to vacation or go to the outside with them friends and family or their friend. Do you know? Many a lot of people spent they will free time just watching TV, or even playing video games all day long. If you want to try to find a new activity here is look different you can read some sort of book. It is really fun for you. If you enjoy the book which you read you can spent all day long to reading a publication. The book Systems Evaluation: Methods, Models, and Applications (Systems Evaluation, Prediction, and Decision-Making) it is quite good to read. There are a lot of individuals who recommended this book. They were enjoying reading this book. If you did not have enough space bringing this book you can buy the e-book. You can m0ore simply to read this book from your smart phone. The price is not too expensive but this book provides high quality.

Joseph Lewis:

Playing with family in a very park, coming to see the ocean world or hanging out with buddies is thing that usually you will have done when you have spare time, and then why you don't try thing that really opposite from that. Just one activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Systems Evaluation: Methods, Models, and Applications (Systems Evaluation, Prediction, and Decision-Making), you may enjoy both. It is great combination right, you still want to miss it? What kind of hang type is it? Oh occur its mind hangout guys. What? Still don't understand it, oh come on its named reading friends.
