Space Based Radar: Theory & Applications S Pillai, Ke Yong Li, Braham Himed

The First Comprehensive Guide to the Principles, Design Methods, and Applications of Space Based Radar

Turn to *Space Based Radar* for authoritative information on the latest developments in Space Based Radar (SBR), covering fundamental principles, cutting-edge design methods, and several new applications. This SBR guide focuses on clutter and target data generation from an SBR platform, and on Space Time Adaptive Processing (STAP) to enhance the target detection and the clutter cancellation capabilities of the radar system.

Designed to save you hours of research time and effort, this one-stop resource explores the full range of SBR topics, including SBR footprint and range foldover phenomenon...Doppler shift that accounts for Earth's rotation...terrain modeling...STAP algorithms for enhanced target detection...and much more. Packed with over 250 full-color illustrations, *Space Based Radar* features:

- Complete coverage of the technical issues associated with SBR and their impact on system performance
- Website contains more than 250 PowerPoint slides for self-study or lectures, and problems and solutions.

Inside This Pioneering SBR Sourcebook

- Introducing Space Based Radar • The Conics • Two Body Orbital Motion and Kepler's Laws • SBR Kinematics • Space Time Adaptive Processing for Space Based Radar • Performance Analysis Using Cramer-Rao Bounds • Waveform Diversity

From reader reviews:

Athena Thornton:

Do you one among people who can't read gratifying if the sentence chained within the straightway, hold on guys this specific aren't like that. This Space Based Radar: Theory & Applications book is readable by you who hate those perfect word style. You will find the information here are arrange for enjoyable reading experience without leaving possibly decrease the knowledge that want to give to you. The writer regarding Space Based Radar: Theory & Applications content conveys the thought easily to understand by many people. The printed and e-book are not different in the content but it just different by means of it. So , do you even now thinking Space Based Radar: Theory & Applications is not loveable to be your top listing reading book?

Johnny Hoffman:

Nowadays reading books are more than want or need but also become a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge your information inside the book that improve your knowledge and information. The info you get based on what kind of publication you read, if you want send more knowledge just go with schooling books but if you want sense happy read one with theme for entertaining like comic or novel. The particular Space Based Radar: Theory & Applications is kind of reserve which is giving the reader unforeseen experience.

Gerald Wright:

Spent a free time and energy to be fun activity to do! A lot of people spent their spare time with their family, or their particular friends. Usually they performing activity like watching television, planning to beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your free time/ holiday? Could be reading a book could be option to fill your no cost time/ holiday. The first thing you ask may be what kinds of e-book that you should read. If you want to attempt look for book, may be the reserve untitled Space Based Radar: Theory & Applications can be good book to read. May be it might be best activity to you.

Betty Bass:

Your reading sixth sense will not betray anyone, why because this Space Based Radar: Theory & Applications book written by well-known writer we are excited for well how to make book that may be understand by anyone who read the book. Written throughout good manner for you, still dripping wet every ideas and producing skill only for eliminate your own hunger then you still doubt Space Based Radar: Theory & Applications as good book but not only by the cover but also with the content. This is one guide that can break don't assess book by its deal with, so do you still needing a different sixth sense to pick this specific!?! Oh come on your examining sixth sense already said so why you have to listening to one more sixth sense.
