Since the birth of the first “test-tube baby” over 30 years ago, society has witnessed a revolution in the area of artificial reproduction. However, many of the options open to infertile people also have ethical implications. This title examines the issues surrounding IVF, egg and embryo freezing, donor insemination and surrogacy, as well as morally ambiguous issues such as the creation of so-called “saviour siblings” and “designer babies” and the use of embryos in medical research. The information comes from a wide range of sources and includes government reports and statistics, newspaper reports, features, magazine articles and surveys, literature from lobby groups and charitable organisations.
