## The Transnational Governance of Violence and Crime: Non-State Actors in Security (Governance and Limited Statehood)

The state monopoly of force has increasingly been challenged by non-state actors, seemingly resulting in a loss of control and resources needed to guarantee security. Yet, non-state actors are not only a cause of problems; they can also contribute to guarantee security. The contributors examine the role of non-state actors in the governance of violence and crime. Current research on non-state actors in security points to the fact that the state monopoly of force has increasingly been challenged, seemingly resulting in a loss of control and resources. In contrast, this volume shows how non-state actors are involved in supporting governmental aims, what they contribute and where the limits are or should be. It demonstrates that even in a core area of the state, transnational governance is possible through the activities of a diverse group of actors, including warlords, rebel groups, criminals, non-governmental organizations and businesses.
