**A comic, bittersweet tale of family evocative of *The Yiddish Policemen's Union* and *Everything Is Illuminated***

Alexander "Sasha" Karnokovitch and his family would like to mourn the passing of his mother, Rachela, with modesty and dignity. But Rachela, a famous Polish émigré mathematician and professor at the University of Wisconsin, is rumored to have solved the million-dollar, Navier-Stokes Millennium Prize problem. Rumor also has it that she spitefully took the solution to her grave. To Sasha's chagrin, a ragtag group of socially challenged mathematicians arrives in Madison and crashes the shiva, vowing to do whatever it takes to find the solution--even if it means prying up the floorboards for Rachela's notes.

Written by a Ph.D. geophysicist, this hilarious and multi-layered debut novel brims with colorful characters and brilliantly captures humanity's drive not just to survive, but to solve the impossible.
