Thermal Food Processing: New Technologies and Quality Issues (Contemporary Food Engineering)

Da-Wen Sun

The challenge of maintaining both quality and safety in the thermal processing of foods results from the degradation of heat-sensitive quality attributes during processing. The editor of *Thermal Food Processing: New Technologies and Quality Issues* presents a comprehensive reference through authors that assist in meeting this challenge by explaining the latest developments and analyzing the latest trends in thermal food processing research and development.

The book is divided into three parts for easy reference. Part I, *Modeling of Thermal Food Processes*, discusses the thermal physical properties of foods, recent developments in heat and mass transfer, innovative modeling techniques including artificial neural network modeling, and computational fluid dynamics. Part II, *Quality and Safety of Thermally Processed Food*, provides the latest research and development information used to maintain high quality and safety standards for certain types of food products including thermally processed meat, poultry, fishery products, dairy products, canned foods, and vegetables.

Part III, *Innovations in Thermal Food Processes*, details existing, alternative thermal processing technologies, outlining their potential, future application in the food industry. These innovations include the ohmic heating technique, radio frequency energies, infrared rays, the combination of pressure and pH with thermal processing, and time-temperature integrators used in evaluating and controlling thermal processes.

From reader reviews:

Dolly Taylor:

Have you spare time for any day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity for spend your time. Any person spent their very own spare time to take a go walking, shopping, or went to often the Mall. How about open or even read a book allowed Thermal Food Processing: New Technologies and Quality Issues (Contemporary Food Engineering)? Maybe it is to be best activity for you. You understand beside you can spend your time using your favorite's book, you can more intelligent than before. Do you agree with it is opinion or you have some other opinion?

Rocio Linville:

Hey guys, do you wants to finds a new book to study? May be the book with the headline Thermal Food Processing: New Technologies and Quality Issues (Contemporary Food Engineering) suitable to you? Typically the book was written by well-known writer in this era. The actual book untitled Thermal Food Processing: New Technologies and Quality Issues (Contemporary Food Engineering)is a single of several books which everyone read now. This kind of book was inspired lots of people in the world. When you read this e-book you will enter the new way of measuring that you ever know ahead of. The author explained their concept in the simple way, and so all of people can easily to comprehend the core of this publication. This book will give you a lot of information about this world now. So you can see the represented of the world within this book.

Chad West:

Why? Because this Thermal Food Processing: New Technologies and Quality Issues (Contemporary Food Engineering) is an unordinary book that the inside of the guide waiting for you to snap the item but latter it will surprise you with the secret the item inside. Reading this book alongside it was fantastic author who have write the book in such remarkable way makes the content inside easier to understand, entertaining means but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This book will give you a lot of advantages than the other book have got such as help improving your talent and your critical thinking way. So , still want to hold up having that book? If I were you I will go to the reserve store hurriedly.

Gary Games:

That publication can make you to feel relax. That book Thermal Food Processing: New Technologies and Quality Issues (Contemporary Food Engineering) was colorful and of course has pictures around. As we know that book Thermal Food Processing: New Technologies and Quality Issues (Contemporary Food Engineering) has many kinds or style. Start from kids until young adults. For example Naruto or Investigation company Conan you can read and believe you are the character on there. Therefore , not at all of book tend to be make you bored, any it offers you feel happy, fun and chill out. Try to choose the best

book for you and try to like reading that.
