**Social work: Making a difference (Social Work in Practice)** Vivienne Cree, Steve Myers

- Social work in the UK has recently undergone its biggest change for 30 years. As new regulatory bodies are working to consolidate social work's professional status, a new training programme, now at degree level, expects increased in-practice learning. Yet until now, students have struggled to find resources to underpin their learning. This major new text addresses the new agenda and explores what social work is in the 21st century. Structured around the framework of the National Occupational Standards for social work - and using terminology and concepts contained within them - the book examines how social work can make a difference in the lives of individuals, families and communities and argues that to really make a difference it is necessary to think outside the box. The book:
  - • provides all social work students with an introductory social work textbook for the 21st century;• follows the six National Occupational Standards for social work;• uses a problem-based learning approach, beginning with a 'real-life' case scenario from social work practice and drawing on messages from theory and research;
- includes a range of student-friendly features including summaries, questions, exercises, further reading and links to other resources.
