Candy Experiments Loralee Leavitt

Candy is more than a sugary snack. With candy, you can become a scientific detective. You can test candy for secret ingredients, peel the skin off candy corn, or float an “m” from M&M’s. You can spread candy dyes into rainbows, or pour rainbow layers of colored water. You’ll learn how to turn candy into crystals, sink marshmallows, float taffy, or send soda spouting skyward. You can even make your own lightning.

Candy Experiments teaches kids a new use for their candy. As children try eye-popping experiments, such as growing enormous gummy worms and turning cotton candy into slime, they’ll also be learning science. Best of all, they’ll willingly pour their candy down the drain.

Candy Experiments contains 70 science experiments, 29 of which have never been previously published. Chapter themes include secret ingredients, blow it up, sink and float, squash it, and other fun experiments about color, density, and heat. The book is written for children between the ages of 7 and 10, though older and younger ages will enjoy it as well. Each experiment includes basic explanations of the relevant science, such as how cotton candy sucks up water because of capillary action, how Pixy Stix cool water because of an endothermic reaction, and how gummy worms grow enormous because of the water-entangling properties.

Henry Evans:

Would you one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Try to pick one book that you just dont know the inside because don't determine book by its cover may doesn't work this is difficult job because you are afraid that the inside maybe not since fantastic as in the outside search likes. Maybe you answer is usually Candy Experiments why because the amazing cover that make you consider with regards to the content will not disappoint anyone. The inside or content is usually fantastic as the outside as well as cover. Your reading sixth sense will directly make suggestions to pick up this book.

Beverly Barber:

As a scholar exactly feel bored to reading. If their teacher requested them to go to the library or to make summary for some e-book, they are complained. Just little students that has reading's internal or real their hobby. They just do what the teacher want, like asked to go to the library. They go to presently there but nothing reading significantly. Any students feel that reading is not important, boring as well as can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Candy Experiments can make you truly feel more interested to read.
