Guía de reforestación. Ilustrada, aumentada y corregida (Spanish Edition) Enrique Trujillo Navarrete
Existe abundante información sobre árboles, producción en vivero y sistemas de plantación de las principales especies tropicales que se utilizan en nuestro medio; está dispersa, en ediciones limitadas, no está organizada temáticamente o editada.

Artículos, conferencias y compilaciones sobre experiencias con las principales especies, fueron base para la organización de este documento. Se entrega la información disponible de una manera ágil, actualizada, con alto nivel, pero de presentación sencilla y didáctica. Se ofrece un manual básico sobre las especies forestales, su producción en vivero y una guía básica de plantación, incluida una metodología de análisis financiero. La información ha sido tomada y adaptada de empresas, publicaciones y personas ampliamente reconocidas.

Llevar a cabo un proyecto de plantación de una magnitud considerable, obliga una consulta más especializada. En las fuentes de información utilizadas, ocasionalmente se encuentra información contradictoria o disímil, lo cual sólo indica la falta de investigación de nuestras especies, para este caso la información registrada corresponde a la que tenga más acuerdos entre los autores o la experiencia del equipo que participó en este trabajo
