Basudeb Bhatta

Research Methods in Remote Sensing (SpringerBriefs in Earth Sciences) Basudeb Bhatta

This book introduces the overall concepts of research methods in Remote Sensing. It also addresses the entire research framework, ranging from ontology to documentation. As such, it covers the theory while providing a solid basis for engaging in concrete research activities. It is not intended as a textbook on remote sensing; rather, it offers guidance to those conducting research by examining philosophical and other issues that are generally not covered by textbooks. Various stages of research are discussed in detail, including illustrative discussions and helpful references. The topics considered in this book cover a part of the research methodologies explored in Master of Philosophy (M.Phil.) and Doctor of Philosophy (Ph.D.) programs. The book's physical format has been kept to a compact, handy minimum in order to maximize its accessibility and readability for a broad range of researchers in the field of remote sensing.

From reader reviews:

Fredrick Alfred:

Often the book Research Methods in Remote Sensing (SpringerBriefs in Earth Sciences) has a lot details on it. So when you read this book you can get a lot of profit. The book was published by the very famous author. The author makes some research just before write this book. This book very easy to read you will get the point easily after reading this article book.

John Wilson:

The book untitled Research Methods in Remote Sensing (SpringerBriefs in Earth Sciences) contain a lot of information on the item. The writer explains the girl idea with easy way. The language is very clear and understandable all the people, so do not really worry, you can easy to read that. The book was published by famous author. The author provides you in the new age of literary works. It is easy to read this book because you can read more your smart phone, or product, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site and order it. Have a nice study.

Steven Burley:

As a university student exactly feel bored to help reading. If their teacher asked them to go to the library as well as to make summary for some publication, they are complained. Just minor students that has reading's heart and soul or real their interest. They just do what the instructor want, like asked to the library. They go to there but nothing reading really. Any students feel that looking at is not important, boring in addition to can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for you. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Research Methods in Remote Sensing (SpringerBriefs in Earth Sciences) can make you truly feel more interested to read.

Theresa Collins:

Book is one of source of information. We can add our expertise from it. Not only for students but native or citizen want book to know the update information of year for you to year. As we know those guides have many advantages. Beside many of us add our knowledge, can also bring us to around the world. By the book Research Methods in Remote Sensing (SpringerBriefs in Earth Sciences) we can take more advantage. Don't one to be creative people? To get creative person must want to read a book. Simply choose the best book that suitable with your aim. Don't be doubt to change your life with this book Research Methods in Remote Sensing (SpringerBriefs in Earth Sciences). You can more attractive than now.
