The Trigeminal System in Man (Advances in Anatomy, Embryology and Cell Biology) Kamen G. Usunoff, Enrico Marani, Jaap H.R. Schoen

This volume of *Advances in Anatomy, Embryology and Cell Biology* is based on material assembled by Dr. Jaap H.R. Schoen. Dr. Schoen was born in Balikpapan, Indonesia, in 1930 and died in Corsica in 1981 during a diving holiday. Dr. Schoen was a neurologist at the Diaconessen Ziekenhuis in The Hague, The Netherlands, and combined his clinical work with a partial tenureship as associated professor in the Department of Neuroanatomy (now the Neuroregulation group) of the Leiden Medical Faculty. For 20 years Dr. Schoen collected pathological specimens from patients with brain disease and together with his technical assistant, Mr. Stins, a large number of Haggqvist, Nauta, and Nissl or Kliiver series were prepared. Little of the studied material has been published. Articles appeared in several journals (*Progress in Brain Research*, *Psychiatria Neurologia*, and *Neurochirurgia*), but since Dr. Schoen also actively participated in the meetings of the Dutch Anatomical Society, a series of short communications can be found in the former *Acta Morphologica Neerlandico-Scandinavica* (now the *European Journal of Morphology*). A list of Schoen's publications has been appended to this preface. Numerous scientists have consulted Schoen's material and, recently, Dr. Jan Voogd published a chapter on the human cerebellum in Paxinos' "The Human Nervous System" (1990) that is based partially on Schoen's material. The Leiden neuroregulation group decided to restore Schoen's material and to publish the manuscripts he left behind.

From reader reviews:

Carolina Jones:

In this 21st millennium, people become competitive in each way. By being competitive now, people have do something to make these survives, being in the middle of the actual crowded place and notice by means of surrounding. One thing that oftentimes many people have underestimated it for a while is reading. Sure, by reading a publication your ability to survive boost then having chance to remain than other is high. For you who want to start reading a book, we give you this kind of The Trigeminal System in Man (Advances in Anatomy, Embryology and Cell Biology) book as nice and daily reading book. Why, because this book is usually more than just a book.

Norma Dickerson:

Here thing why this particular The Trigeminal System in Man (Advances in Anatomy, Embryology and Cell Biology) are different and trusted to be yours. First of all examining a book is good but it depends in the content of computer which is the content is as yummy as food or not. The Trigeminal System in Man (Advances in Anatomy, Embryology and Cell Biology) giving you information deeper and in different ways, you can find any reserve out there but there is no reserve that similar with The Trigeminal System in Man (Advances in Anatomy, Embryology and Cell Biology). It gives you thrill studying journey, its open up your eyes about the thing in which happened in the world which is perhaps can be happened around you. It is easy to bring everywhere like in playground, café, or even in your approach home by train. If you are having difficulties in bringing the published book maybe the form of The Trigeminal System in Man (Advances in Anatomy, Embryology and Cell Biology) in e-book can be your alternate.

Lionel Gutierrez:

Typically the book The Trigeminal System in Man (Advances in Anatomy, Embryology and Cell Biology) has a lot of knowledge on it. So when you read this book you can get a lot of help. The book was written by the very famous author. The author makes some research previous to write this book. This particular book very easy to read you can obtain the point easily after reading this article book.

Karen Tullis:
